

REMARKS/ARGUMENTS

Applicants request entry of a substitute sequence listing in adherence with 37 C.F.R. §§1.821 - 1.825. In order to comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures, 37 C.F.R. §§ 1.821-1.825, Applicants submitted a sequence listing in paper and computer readable format (CRF) on July 13, 2001.

Upon review, Applicants have noted that the sequence listing improperly presented some sequences. The substitute sequence listing, submitted herewith, properly presents all sequences. These revisions conform the sequences of the substitute sequence listing to the sequences presented in the specification and figures and thus do not constitute new matter.

This amendment is accompanied by a floppy disk containing a CRF substitute sequence listing containing the above named sequences, SEQ ID NOS:1-104, and a paper copy of the sequence information which has been printed from the floppy disk. The information contained in the computer readable disk was prepared through the use of the software program "PatentIn" and is identical to that of the paper copy.

The specification has been amended to include sequence identifiers (SEQ ID NOS) to conform the specification to the substitute sequence listing submitted herewith, and to correct minor typographical errors. These amendments also do not constitute new matter.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 650-326-2400.

Respectfully submitted,

Anina D. Murphy
